

MEDICATED TREATMENTS

MEDICATED TREATMENT RELEASE

At PAW AFTER PAW, we prioritise the health and comfort of your pet. Fleas and ticks can cause significant discomfort and health issues, and we use medicated treatments to effectively address these concerns. To ensure the safety and well-being of your pet, please review and acknowledge the following information regarding medicated treatments.

By signing below, you acknowledge and accept the following:

Medicated Treatments:

- We use specialised flea and tick treatments to ensure your pet is free from these pests. These treatments are safe when used as directed but can sometimes cause mild skin irritation or allergic reactions.

Potential Reactions:

- While adverse reactions are rare, they can include redness, itching, or more severe allergic responses. It is important to monitor your pet after treatment and contact us immediately if any adverse reactions occur.

Ongoing Maintenance:

- Regular use of flea and tick prevention at home is crucial for maintaining your pet's health. We recommend discussing ongoing preventative measures with your veterinarian.

Pre-existing Conditions:

- Please inform us of any pre-existing skin conditions or allergies your pet may have, as this will help us choose the most appropriate treatment.

By signing below, I confirm that I have read, understood, and agree to the terms outlined in this medicated treatment release. I understand the risks associated with flea and tick treatments and consent to their use on my pet.

Consent for medicated treatment: Yes / No (Circle One)

Acknowledgment of potential risks: Yes / No (Circle One)
